- Excellent value for money
- Cost-efficient regeneration by means of retopping
- Numerous IAAF Class 1 and Class 2 certificates
- Tested in accordance with national and international standards

A close-up photograph of a female athlete in a red singlet and shorts, running on a track. She is in a dynamic pose, leaning forward with her arms pumping. Her singlet has the number 51 and the word TOYOTA on it. The background is a blurred crowd in a stadium.

**Track surfaces for
peak performance.**

NUMBER 1

CONICA Athletic Track Surfaces are ecologically friendly because of our high-tech products, which are in line with all relevant regulations and technical standards. They support athletes in their efforts to achieve top performance and at the same time reduce injury risks. Our system solutions are extremely durable and weather resistant. Therefore functionality is maintained for decades and the systems can be installed and used in all climates.
